Myrwallet is the wallet where your personal assets (ether) are stored. How to synchronize with the server First go to the Wallet tab on Myrwallet. Select All to synchronize all assets to the Mytherium network. Select Sync only this wallet to synchronize just the assets of this wallet. How to connect To connect you need to give an Ethereum address to your Mytherium wallet. You can get more information about it on the Wallet tab in Myrwallet. You can find your Ethereum address by typing m.cryptokeystore.com on your browser. The easiest way is to enter your Mytherium password and hit connect with your mouse. If the address you typed is correct, your transaction will be received. Steps to send your Ether 1. Select the option Send Ether 2. Your transaction will appear in the transactions tab. 3. Write out the amount of Ether you want to send to the address you want, add a description and confirm. 4. Send your transaction! If something went wrong it is very possible that the Mytherium Server is not running or that you are using an old browser. If you have any issue, please contact us on contact@m.cryptokeystore.com.
